

The world's smallest country just made a big move: Vatican City is now powered entirely by solar energy, setting an example for global climate action.

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

The Vatican's renewable energy achievement demonstrates how even the world's smallest nations can join countries running on renewable energy. Vatican City has achieved ...

In a quiet corner of the Roman countryside, an ambitious project is taking shape--one that seeks not only to power the Vatican City entirely through renewable energy, but also to embody the...

Vatican City has joined Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia and the Democratic Republic of Congo to become one of just eight countries in the world to generate 100% ...

By reducing its reliance on non-renewable energy sources, Vatican City significantly decreases its carbon emissions. The solar initiatives contribute to cleaner air and set a powerful example for ...

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside ...

Vatican City is on track to become the 8th country in the world to generate 100% of its electricity from renewable energy, following Pope Francis' announcement about plans to build a large solar plant.

This tradition got a recent boost. The late Pope Francis' goal of powering the Vatican by 100% solar energy is happening now as Vatican City becomes the first fully powered solar state.

The Vatican is set to join an elite group of nations generating all their electricity from renewable sources, following Pope Francis's announcement of a new solar power project.
