

What happened to the photovoltaic panels

In a shock for the industry, the latest draft of the One Big Beautiful Bill Act excludes residential solar lease providers from the Investment Tax Credit. From pv magazine USA. The US ...

PHILADELPHIA -- The solar power industry is booming and that growth helps the world meet its climate goals by replacing fossil fuels. But an emerging problem in the U.S. solar business ...

For weeks, I'd been wrangling with my solar dealer about the panels it had installed on my roof months earlier. I'd passed all the necessary inspections.

Though solar represented just 3.4% of the nation's electricity generation in 2022, studies show that rooftop solar could eventually meet residential electricity demand in many states if...

Is now a bad time to buy solar panels? It might be a bit of a slow period for the solar industry, but that doesn't mean you should delay a solar installation on your own home.

After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. This led to large capital ...

Yes, solar panels are still worth it for the vast majority of U.S. homeowners in 2026 and beyond, despite the end of the 30% federal solar tax credit for some systems. The primary financial driver is the cost ...

End-of-life management for photovoltaics (PV) refers to the processes that occur when solar panels and other components of a PV system (racking, inverters, etc.) are retired from operation.

Explore what happens to photovoltaic panels when they reach the end of their life. Learn about environmental risks and profitable recycling

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...
