

Which wireless outdoor base station is the best

Why should you choose TP-Link outdoor wireless base station?

With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage. The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users.

Why should a base station be placed indoors?

Positioning the base station indoors also mitigates the challenge of retrieving video evidence if the outdoor cameras are tampered with, guaranteeing stable, secure, and uninterrupted recording. *The base station supports direct storage using SD cards ranging from 16GB to 256GB.

Which Ubiquiti access point is best for outdoor use?

The Unifi Mesh access point is at the moment the most popular access point from Ubiquiti to use outdoors. It comes with two adjustable Omni antennas that can be angled 45 degrees to cover the area beneath the access point better. The antennas are removable, allowing you to replace them with spot-beam antennae for example.

Do I need an outdoor WiFi access point?

Without an outdoor wifi access point, you have probably noticed that your wifi signal is too weak. Exterior walls and glass are great at blocking wifi signals, so to solve this you really have to place an access point outside. An outdoor ap can also be used to extend your wireless network into your garage or outbuilding that you might have.
