

How much does wind energy cost?

Between June and July, the market prices for onshore and offshore wind both increased dramatically, reaching 0.278 Euro/kWh and 0.287 Euro/kWh, respectively owing to an exponential increase in demand. Procurement Resource provides latest prices of Wind Energy.

How has wind energy index changed over the past month?

Wind Energy Index rose to 20.55 USD on December 24, 2025, up 0.15% from the previous day. Over the past month, Wind Energy Index's price has risen 5.33%, and is up 36.36% compared to the same time last year, according to trading on a contract for difference (CFD) that tracks the benchmark market for this commodity.

What is the global wind power market?

The global wind power market has been growing fast in recent years. The International Energy Agency (IEA) says that more and more wind power is being generated each year, and that it will keep growing in the next few years. In Europe, the United States, and China, wind power is becoming an important part of the energy mix.

How are wind power costs calculated?

The cost and economic competitiveness of wind power generation were generally calculated with the levelized cost of electricity (LCOE) model, which represents the average cost of power generation during the lifetime [10, ...]. As wind capacity expands and technological advancements occur, wind power costs decrease.

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets. It contains data about wind farms, turbines, manufacturers, ...

Wind Energy Index fell to 22.22 USD on February 5, 2026, down 2.67% from the previous day. Over the past month, Wind Energy Index's price has risen 2.63%, and is up 49.03% compared to the same ...

The trajectory of wind power development in China has experienced significant acceleration following the implementation of the Renewable Energy Law in 2006 [6, 7]. As one of the ...

million U.S. dollars. After a period of falling costs, wind turbine prices increased significantly in 2021 and 2022, reaching the highest value of the last 10 years in 2022.

Solar (photovoltaic) panels cumulative capacity Solar and wind power generation Solar energy generation by region Solar energy generation vs. capacity Solar photovoltaic module prices vs. ...

The report provides data and analysis on the historic and forecasts of wind power capacity and generation, geo-political scenario, market size, and market drivers and challenges for twelve key ...

Procurement Resource offers Wind Energy trend analysis, news updates, and a database with market prices. Use our graphing tool to track price changes over time, compare rates globally, and ...

This dashboard provides an overview on the latest wind costs.

Wind Industry Trend Analysis The global wind power market has been growing fast in recent years. The International Energy Agency (IEA) says that more and more wind power is being ...

The Global Wind Market Development - Supply Side Data 2024 represents a detailed account of wind turbines mechanically installed globally from all active suppliers over the past year ...
