

Wind power project power generation forecast report

Combined Wind and Solar is a graphical representation of estimated wind and solar power production amounts for the Current Operating Day and the Next Day.

Electricity markets in regions such as Europe face the prospect of increasing negative power prices over the coming years if policy, regulatory and technological measures are not taken to safeguard wind ...

For the first time, the Report has conducted an annual forecast of global new energy generation capacity, noting that global wind power and photovoltaic generation capacity will increase ...

The scope of the Offshore Wind Market Report: 2024 Edition covers the global fleet of projects in the pipeline through Dec. 31, 2023, and U.S. developments and events through May 31, 2024.

Global Wind Power Growth Accelerates in the First Half of 2025. The report can here be downloaded in pdf format.

In our latest Short-Term Energy Outlook, we forecast that wind and solar energy will lead growth in U.S. power generation for the next two years. As a result of new solar projects coming on ...

Founded in 2005, Global Wind Energy Council (GWEC) has supported wind energy's rise to over 1.1 TW, now accounting for 8% of global electricity generation. Explore the report to learn more.

Renewables 2025 - Analysis and key findings. A report by the International Energy Agency.

The GWEC Global Wind Report 2025 reviews the industry's 2024 performance and outlines the path to accelerated growth. It stresses the importance of sustained investment and innovation.

The wind turbine market size exceeded USD 170.9 billion in 2025 and is estimated to grow at a CAGR of 7.3% from 2026 to 2034, driven by rising renewable energy adoption and expanding offshore wind ...
