

In March 2020, State Grid Shaanxi partnered with Huawei to establish a joint innovation lab, where they worked with 28 other partners to develop a variety of innovative solutions.

The Beijing-based State-owned enterprise said six UHV AC power transmission projects are expected to be completed and put into operation this year, while the company will also promote ...

In this paper, an open dataset consisting of data collected from on-site renewable energy stations, including six wind farms and eight solar stations in China, is provided. Over two years...

In recent years, the global energy transition has entered a phase of accelerated advancement, and China has also stepped into a new stage of building a modern energy system. How to break through ...

The scale of the East China Power Grid's grid-integrated new energy has increased by more than 200% since 2015 and has experienced an annual growth rate of 50%.

15 Jan Data-model fusing driven robust configuration optimization model and decision-making method for renewable energy generation base considering electric-hydrogen conversion?

Through services such as energy efficiency diagnostics and the development of a virtual power plant ecosystem, State Grid is also collaborating closely with partners across the energy value ...

To address this, the Department of Energy initiated 58 projects in 2023 aimed at modernizing the grid, ensuring a reliable and cost-effective power supply. In China, however, energy ...

the electricity grid was restructured into two SOEs: The State Grid Corporation and The China Southern Power Grid. State Grid Corporation accounts for 80% of elec

By introducing AI technology to monitoring transmission lines, the measure can quickly identify fault points in infrared video images to detect any defects, and assist operation and ...

Looking ahead, State Grid will accelerate power grid construction and support new energy development, ensuring reliable power for economic and social progress and modernization ...
